### Contact

 +919305852750

 ashish14072002@gmail.com

 New Ashok Nagar, 110096, New Delhi

### Technical Skills

- **Languages:** Core Java, Javascript, HTML5/CSS3.
- **Libraries/Frameworks:** React.js, MUI, Bootstrap.
- **Tools/Platforms:** Git, GitHub, VS code.
- **Database:** MySQL.
- **Other Skills:** Responsive design, API Integration.

### Achievements & Leadership

- Solved 150+ coding challenges on CodeChef.  
<https://www.codechef.com/users/ashishyadav21>
- I Led a team during a pool campus code-fest, achieving recognition and certification for leadership skills.

### Certifications and Training

- Web Development Workshop
- DSA (Data Structures and Algorithms)

### Education

#### Shambhunath College of Education

Bachelor of Computer Application

July 2021- May 2024

#### Sangam International School

Intermediate July 2021

High School July 2019

### Soft Skills

- Problem-Solving
- Leadership
- Team Collaboration

### Profile

Enthusiastic and detail-oriented Front-End Developer in designing, developing, and deploying responsive and visually appealing web applications. Proficient in modern front-end technologies like React and MUI. Strong problem-solving abilities demonstrated by completing 150+ coding challenges on CodeChef.

### Projects

**E-commerce Website** | React.js, MUI, Bootstrap, Vite, Dynamic Routing | [Link](#)

- **Advanced Product Filtering:** Integrated category and price filters, providing users with tailored search results that improve shopping efficiency.
- **Product Details & Related Products:** Developed detailed product pages with related items to enhance browsing.
- **Comprehensive Cart Management:** Added features to adjust item quantities, remove single items, or clear the entire cart with Loading State.
- **Billing & Checkout:** Integrated bill generation and "Proceed to Pay" for a complete checkout flow.
- Optimized with Vite to ensure fast load times, modular structure, and responsive.

**Social Media** | React.js, MUI, Bootstrap, Dummy API | [Link](#)

- Implemented features such as post-creation, deletion, and search functionality using React.
- Hooks Utilized: use Reducer, useRef, use Context, use Location, use State, useNavigate, useEffect, etc.
- Utilized React Router and Context API to manage application state efficiently.
- It also uses Bootstrap and MUI to enhance creativity and have a loading state.

### Minor Projects

- **Weather App:** | React, Weather API, MUI | [Link](#)
- **AI Image Generator:** Generating AI Images using OpenAI API.
- **Quiz Application:** Timer-based quiz app using JavaScript.

### Work Experience

**Oasis Infobyte** | Web Developer Intern

Jan 2023-Feb 2023

- Gained practical web development experience through hands-on projects.
- Developed applications including a Temperature Converter, E-commerce Landing Page, and Portfolio.
- Demonstrated foundational skills and knowledge in web technologies and application development.

**Codsoft** | Java Programming Intern

Nov 2023-Dec 2023

- Acquired practical Java programming experience by working on various projects.
- Developed Java-based applications such as an ATM Interface, Student Grade Calculator, and Number Game.
